MEMORANDUM FOR THE RECORD

SUBJECT: Davis Monthan Collocation Study

25X1 1. Today I received a call from [] to tell me that Dr. Flax had "kicked back" the study submitted by Col. Saunders, [] and Mr. Parangosky. He apparently attached a note which said that the study was adequate in terms of reasons against a move, but that it didn't list any arguments which would favor collocation. He seems to feel that, if we are to be objective, we should present both sides of the problem.

25X1 2. I explained to [] that there were several major factors which were clearly the most important considerations, and which would have made it impossible to move to Davis Monthan regardless of the secondary advantages which might have accrued. These were (a) the base doesn't have the capacity to handle the activities which it already has, (b) the Air Force is spending [] to provide for its own needs, (c) it would cost an additional [] to provide facilities there for the IDEALIST detachment, (d) the operational limitations posed by the inadequate facilities, such as the single runway, would make it impossible to maintain an adequate training program, and (e) the security problems associated with the proximity to the overt operations and the city of Tucson would be very difficult to overcome. He acknowledged that this was the case but seemed to feel that we had to prepare a supplement to the study to meet Dr. Flax's requirement for "objectivity". 25X1

25X1 3. [] understands that, in submitting a supplement showing how we could effect savings in the event of collocation, we must assume the expenditure of about [] to put us in a posture to realize these savings. 25X1 I told him that we would review the situation and try to prepare a paper to meet the new requirement.

NRO and USAF review(s) completed.
